Syllabus

NOTE: Where it is feasible, a syllabus (headnote) will be released, as is being done in connection with this case, at the time the opinion is issued. The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See *United States v. Detroit Timber & Lumber Co.*, 200 U. S. 321, 337.

SUPREME COURT OF THE UNITED STATES

Syllabus

SOUTH DAKOTA *v.* WAYFAIR, INC., ET AL.

CERTIORARI TO THE SUPREME COURT OF SOUTH DAKOTA

No. 17–494. Argued April 17, 2018—Decided June 21, 2018

South Dakota, like many States, taxes the retail sales of goods and services in the State. Sellers are required to collect and remit the tax to the State, but if they do not then in-state consumers are responsible for paying a use tax at the same rate. Under *National Bellas Hess, Inc. v. Department of Revenue of Ill.*, 386 U. S. 753, and *Quill Corp. v. North Dakota*, 504 U. S. 298, South Dakota may not require a business that has no physical presence in the State to collect its sales tax. Consumer compliance rates are notoriously low, however, and it is estimated that *Bellas Hess* and *Quill* cause South Dakota to lose between \$48 and \$58 million annually. Concerned about the erosion of its sales tax base and corresponding loss of critical funding for state and local services, the South Dakota Legislature enacted a law requiring out-of-state sellers to collect and remit sales tax “as if the seller had a physical presence in the State.” The Act covers only sellers that, on an annual basis, deliver more than \$100,000 of goods or services into the State or engage in 200 or more separate transactions for the delivery of goods or services into the State. Respondents, top online retailers with no employees or real estate in South Dakota, each meet the Act’s minimum sales or transactions requirement, but do not collect the State’s sales tax. South Dakota filed suit in state court, seeking a declaration that the Act’s requirements are valid and applicable to respondents and an injunction requiring respondents to register for licenses to collect and remit the sales tax. Respondents sought summary judgment, arguing that the Act is unconstitutional. The trial court granted their motion. The State Supreme Court affirmed on the ground that *Quill* is controlling precedent.

Held: Because the physical presence rule of *Quill* is unsound and incorrect, *Quill Corp. v. North Dakota*, 504 U. S. 298, and *National Bellas*

Syllabus

Hess, Inc. v. Department of Revenue of Ill., 386 U. S. 753, are overruled. Pp. 5–24.

(a) An understanding of this Court’s Commerce Clause principles and their application to state taxes is instructive here. Pp. 5–9.

(1) Two primary principles mark the boundaries of a State’s authority to regulate interstate commerce: State regulations may not discriminate against interstate commerce; and States may not impose undue burdens on interstate commerce. These principles guide the courts in adjudicating challenges to state laws under the Commerce Clause. Pp. 5–7.

(2) They also animate Commerce Clause precedents addressing the validity of state taxes, which will be sustained so long as they (1) apply to an activity with a substantial nexus with the taxing State, (2) are fairly apportioned, (3) do not discriminate against interstate commerce, and (4) are fairly related to the services the State provides. See *Complete Auto Transit, Inc. v. Brady*, 430 U. S. 274, 279. Before *Complete Auto*, the Court held in *Bellas Hess* that a “seller whose only connection with customers in the State is by common carrier or . . . mail” lacked the requisite minimum contacts with the State required by the Due Process Clause and the Commerce Clause, and that unless the retailer maintained a physical presence in the State, the State lacked the power to require that retailer to collect a local tax. 386 U. S., at 758. In *Quill*, the Court overruled the due process holding, but not the Commerce Clause holding, grounding the physical presence rule in *Complete Auto*’s requirement that a tax have a “substantial nexus” with the activity being taxed. Pp. 7–9.

(b) The physical presence rule has long been criticized as giving out-of-state sellers an advantage. Each year, it becomes further removed from economic reality and results in significant revenue losses to the States. These critiques underscore that the rule, both as first formulated and as applied today, is an incorrect interpretation of the Commerce Clause. Pp. 9–17.

(1) *Quill* is flawed on its own terms. First, the physical presence rule is not a necessary interpretation of *Complete Auto*’s nexus requirement. That requirement is “closely related,” *Bellas Hess*, 386 U. S. at 756, to the due process requirement that there be “some definite link, some minimum connection, between a state and the person, property or transaction it seeks to tax.” *Miller Brothers Co. v. Maryland*, 347 U. S. 340, 344–345. And, as *Quill* itself recognized, a business need not have a physical presence in a State to satisfy the demands of due process. When considering whether a State may levy a tax, Due Process and Commerce Clause standards, though not identical or coterminous, have significant parallels. The reasons given in *Quill* for rejecting the physical presence rule for due process purposes

Syllabus

apply as well to the question whether physical presence is a requisite for an out-of-state seller's liability to remit sales taxes. Other aspects of the Court's doctrine can better and more accurately address potential burdens on interstate commerce, whether or not *Quill's* physical presence rule is satisfied.

Second, *Quill* creates rather than resolves market distortions. In effect, it is a judicially created tax shelter for businesses that limit their physical presence in a State but sell their goods and services to the State's consumers, something that has become easier and more prevalent as technology has advanced. The rule also produces an incentive to avoid physical presence in multiple States, affecting development that might be efficient or desirable.

Third, *Quill* imposes the sort of arbitrary, formalistic distinction that the Court's modern Commerce Clause precedents disavow in favor of "a sensitive, case-by-case analysis of purposes and effects," *West Lynn Creamery, Inc. v. Healy*, 512 U. S. 186, 201. It treats economically identical actors differently for arbitrary reasons. For example, a business that maintains a few items of inventory in a small warehouse in a State is required to collect and remit a tax on all of its sales in the State, while a seller with a pervasive Internet presence cannot be subject to the same tax for the sales of the same items. Pp. 10–14.

(2) When the day-to-day functions of marketing and distribution in the modern economy are considered, it becomes evident that *Quill's* physical presence rule is artificial, not just "at its edges," 504 U. S. at 315, but in its entirety. Modern e-commerce does not align analytically with a test that relies on the sort of physical presence defined in *Quill*. And the Court should not maintain a rule that ignores substantial virtual connections to the State. Pp. 14–15.

(3) The physical presence rule of *Bellas Hess* and *Quill* is also an extraordinary imposition by the Judiciary on States' authority to collect taxes and perform critical public functions. Forty-one States, two Territories, and the District of Columbia have asked the Court to reject *Quill's* test. Helping respondents' customers evade a lawful tax unfairly shifts an increased share of the taxes to those consumers who buy from competitors with a physical presence in the State. It is essential to public confidence in the tax system that the Court avoid creating inequitable exceptions. And it is also essential to the confidence placed in the Court's Commerce Clause decisions. By giving some online retailers an arbitrary advantage over their competitors who collect state sales taxes, *Quill's* physical presence rule has limited States' ability to seek long-term prosperity and has prevented market participants from competing on an even playing field. Pp. 16–17.

Syllabus

(c) *Stare decisis* can no longer support the Court’s prohibition of a valid exercise of the States’ sovereign power. If it becomes apparent that the Court’s Commerce Clause decisions prohibit the States from exercising their lawful sovereign powers, the Court should be vigilant in correcting the error. It is inconsistent with this Court’s proper role to ask Congress to address a false constitutional premise of this Court’s own creation. The Internet revolution has made *Quill*’s original error all the more egregious and harmful. The *Quill* Court did not have before it the present realities of the interstate marketplace, where the Internet’s prevalence and power have changed the dynamics of the national economy. The expansion of e-commerce has also increased the revenue shortfall faced by States seeking to collect their sales and use taxes, leading the South Dakota Legislature to declare an emergency. The argument, moreover, that the physical presence rule is clear and easy to apply is unsound, as attempts to apply the physical presence rule to online retail sales have proved unworkable.

Because the physical presence rule as defined by *Quill* is no longer a clear or easily applicable standard, arguments for reliance based on its clarity are misplaced. *Stare decisis* may accommodate “legitimate reliance interest[s],” *United States v. Ross*, 456 U. S. 798, 824, but a business “is in no position to found a constitutional right . . . on the practical opportunities for tax avoidance,” *Nelson v. Sears, Roebuck & Co.*, 312 U. S. 359, 366. Startups and small businesses may benefit from the physical presence rule, but here South Dakota affords small merchants a reasonable degree of protection. Finally, other aspects of the Court’s Commerce Clause doctrine can protect against any undue burden on interstate commerce, taking into consideration the small businesses, startups, or others who engage in commerce across state lines. The potential for such issues to arise in some later case cannot justify retaining an artificial, anachronistic rule that deprives States of vast revenues from major businesses. Pp. 17–22.

(d) In the absence of *Quill* and *Bellas Hess*, the first prong of the *Complete Auto* test simply asks whether the tax applies to an activity with a substantial nexus with the taxing State, 430 U. S., at 279. Here, the nexus is clearly sufficient. The Act applies only to sellers who engage in a significant quantity of business in the State, and respondents are large, national companies that undoubtedly maintain an extensive virtual presence. Any remaining claims regarding the Commerce Clause’s application in the absence of *Quill* and *Bellas Hess* may be addressed in the first instance on remand. Pp. 22–23.

2017 S.D. 56, 901 N. W. 2d 754, vacated and remanded.

KENNEDY, J., delivered the opinion of the Court, in which THOMAS,

Syllabus

GINSBURG, ALITO, and GORSUCH, JJ., joined. THOMAS, J., and GORSUCH, J., filed concurring opinions. ROBERTS, C. J., filed a dissenting opinion, in which BREYER, SOTOMAYOR, and KAGAN, JJ., joined.

Opinion of the Court

NOTICE: This opinion is subject to formal revision before publication in the preliminary print of the United States Reports. Readers are requested to notify the Reporter of Decisions, Supreme Court of the United States, Washington, D. C. 20543, of any typographical or other formal errors, in order that corrections may be made before the preliminary print goes to press.

SUPREME COURT OF THE UNITED STATES

No. 17–494

SOUTH DAKOTA, PETITIONER *v.* WAYFAIR, INC.,
ET AL.

ON WRIT OF CERTIORARI TO THE SUPREME COURT OF
SOUTH DAKOTA

[June 21, 2018]

JUSTICE KENNEDY delivered the opinion of the Court.

When a consumer purchases goods or services, the consumer’s State often imposes a sales tax. This case requires the Court to determine when an out-of-state seller can be required to collect and remit that tax. All concede that taxing the sales in question here is lawful. The question is whether the out-of-state seller can be held responsible for its payment, and this turns on a proper interpretation of the Commerce Clause, U. S. Const., Art. I, §8, cl. 3.

In two earlier cases the Court held that an out-of-state seller’s liability to collect and remit the tax to the consumer’s State depended on whether the seller had a physical presence in that State, but that mere shipment of goods into the consumer’s State, following an order from a catalog, did not satisfy the physical presence requirement. *National Bellas Hess, Inc. v. Department of Revenue of Ill.*, 386 U. S. 753 (1967); *Quill Corp. v. North Dakota*, 504 U. S. 298 (1992). The Court granted certiorari here to reconsider the scope and validity of the physical presence rule mandated by those cases.

Opinion of the Court

I

Like most States, South Dakota has a sales tax. It taxes the retail sales of goods and services in the State. S. D. Codified Laws §§10-45-2, 10-45-4 (2010 and Supp. 2017). Sellers are generally required to collect and remit this tax to the Department of Revenue. §10-45-27.3. If for some reason the sales tax is not remitted by the seller, then in-state consumers are separately responsible for paying a use tax at the same rate. See §§10-46-2, 10-46-4, 10-46-6. Many States employ this kind of complementary sales and use tax regime.

Under this Court's decisions in *Bellas Hess* and *Quill*, South Dakota may not require a business to collect its sales tax if the business lacks a physical presence in the State. Without that physical presence, South Dakota instead must rely on its residents to pay the use tax owed on their purchases from out-of-state sellers. "[T]he impracticability of [this] collection from the multitude of individual purchasers is obvious." *National Geographic Soc. v. California Bd. of Equalization*, 430 U. S. 551, 555 (1977). And consumer compliance rates are notoriously low. See, e.g., GAO, Report to Congressional Requesters: Sales Taxes, States Could Gain Revenue from Expanded Authority, but Businesses Are Likely to Experience Compliance Costs 5 (GAO-18-114, Nov. 2017) (Sales Taxes Report); California State Bd. of Equalization, Revenue Estimate: Electronic Commerce and Mail Order Sales 7 (2013) (Table 3) (estimating a 4 percent collection rate). It is estimated that *Bellas Hess* and *Quill* cause the States to lose between \$8 and \$33 billion every year. See Sales Taxes Report, at 11-12 (estimating \$8 to \$13 billion); Brief for Petitioner 34-35 (citing estimates of \$23 and \$33.9 billion). In South Dakota alone, the Department of Revenue estimates revenue loss at \$48 to \$58 million annually. App. 24. Particularly because South Dakota has no state income tax, it must put substantial reliance on its sales

Opinion of the Court

and use taxes for the revenue necessary to fund essential services. Those taxes account for over 60 percent of its general fund.

In 2016, South Dakota confronted the serious inequity *Quill* imposes by enacting S. 106—“An Act to provide for the collection of sales taxes from certain remote sellers, to establish certain Legislative findings, and to declare an emergency.” S. 106, 2016 Leg. Assembly, 91st Sess. (S. D. 2016) (S. B. 106). The legislature found that the inability to collect sales tax from remote sellers was “seriously eroding the sales tax base” and “causing revenue losses and imminent harm . . . through the loss of critical funding for state and local services.” §8(1). The legislature also declared an emergency: “Whereas, this Act is necessary for the support of the state government and its existing public institutions, an emergency is hereby declared to exist.” §9. Fearing further erosion of the tax base, the legislature expressed its intention to “apply South Dakota’s sales and use tax obligations to the limit of federal and state constitutional doctrines” and noted the urgent need for this Court to reconsider its precedents. §§8(11), (8).

To that end, the Act requires out-of-state sellers to collect and remit sales tax “as if the seller had a physical presence in the state.” §1. The Act applies only to sellers that, on an annual basis, deliver more than \$100,000 of goods or services into the State or engage in 200 or more separate transactions for the delivery of goods or services into the State. *Ibid.* The Act also forecloses the retroactive application of this requirement and provides means for the Act to be appropriately stayed until the constitutionality of the law has been clearly established. §§5, 3, 8(10).

Respondents Wayfair, Inc., Overstock.com, Inc., and Newegg, Inc., are merchants with no employees or real estate in South Dakota. Wayfair, Inc., is a leading online

Opinion of the Court

retailer of home goods and furniture and had net revenues of over \$4.7 billion last year. Overstock.com, Inc., is one of the top online retailers in the United States, selling a wide variety of products from home goods and furniture to clothing and jewelry; and it had net revenues of over \$1.7 billion last year. Newegg, Inc., is a major online retailer of consumer electronics in the United States. Each of these three companies ships its goods directly to purchasers throughout the United States, including South Dakota. Each easily meets the minimum sales or transactions requirement of the Act, but none collects South Dakota sales tax. 2017 S. D. 56, ¶¶ 10–11, 901 N. W. 2d 754, 759–760.

Pursuant to the Act’s provisions for expeditious judicial review, South Dakota filed a declaratory judgment action against respondents in state court, seeking a declaration that the requirements of the Act are valid and applicable to respondents and an injunction requiring respondents to register for licenses to collect and remit sales tax. App. 11, 30. Respondents moved for summary judgment, arguing that the Act is unconstitutional. 901 N. W. 2d, at 759–760. South Dakota conceded that the Act cannot survive under *Bellas Hess* and *Quill* but asserted the importance, indeed the necessity, of asking this Court to review those earlier decisions in light of current economic realities. 901 N. W. 2d, at 760; see also S. B. 106, §8. The trial court granted summary judgment to respondents. App. to Pet. for Cert. 17a.

The South Dakota Supreme Court affirmed. It stated: “However persuasive the State’s arguments on the merits of revisiting the issue, *Quill* has not been overruled [and] remains the controlling precedent on the issue of Commerce Clause limitations on interstate collection of sales and use taxes.” 901 N. W. 2d, at 761. This Court granted certiorari. 583 U. S. ____ (2018).

Opinion of the Court

II

The Constitution grants Congress the power “[t]o regulate Commerce . . . among the several States.” Art. I, §8, cl. 3. The Commerce Clause “reflect[s] a central concern of the Framers that was an immediate reason for calling the Constitutional Convention: the conviction that in order to succeed, the new Union would have to avoid the tendencies toward economic Balkanization that had plagued relations among the Colonies and later among the States under the Articles of Confederation.” *Hughes v. Oklahoma*, 441 U. S. 322, 325–326 (1979). Although the Commerce Clause is written as an affirmative grant of authority to Congress, this Court has long held that in some instances it imposes limitations on the States absent congressional action. Of course, when Congress exercises its power to regulate commerce by enacting legislation, the legislation controls. *Southern Pacific Co. v. Arizona ex rel. Sullivan*, 325 U. S. 761, 769 (1945). But this Court has observed that “in general Congress has left it to the courts to formulate the rules” to preserve “the free flow of interstate commerce.” *Id.*, at 770.

To understand the issue presented in this case, it is instructive first to survey the general development of this Court’s Commerce Clause principles and then to review the application of those principles to state taxes.

A

From early in its history, a central function of this Court has been to adjudicate disputes that require interpretation of the Commerce Clause in order to determine its meaning, its reach, and the extent to which it limits state regulations of commerce. *Gibbons v. Ogden*, 9 Wheat. 1 (1824), began setting the course by defining the meaning of commerce. Chief Justice Marshall explained that commerce included both “the interchange of commodities” and “commercial intercourse.” *Id.*, at 189, 193. A concurring opin-

Opinion of the Court

ion further stated that Congress had the exclusive power to regulate commerce. See *id.*, at 236 (opinion of Johnson, J.). Had that latter submission prevailed and States been denied the power of concurrent regulation, history might have seen sweeping federal regulations at an early date that foreclosed the States from experimentation with laws and policies of their own, or, on the other hand, proposals to reexamine *Gibbons'* broad definition of commerce to accommodate the necessity of allowing States the power to enact laws to implement the political will of their people.

Just five years after *Gibbons*, however, in another opinion by Chief Justice Marshall, the Court sustained what in substance was a state regulation of interstate commerce. In *Willson v. Black Bird Creek Marsh Co.*, 2 Pet. 245 (1829), the Court allowed a State to dam and bank a stream that was part of an interstate water system, an action that likely would have been an impermissible intrusion on the national power over commerce had it been the rule that only Congress could regulate in that sphere. See *id.*, at 252. Thus, by implication at least, the Court indicated that the power to regulate commerce in some circumstances was held by the States and Congress concurrently. And so both a broad interpretation of interstate commerce and the concurrent regulatory power of the States can be traced to *Gibbons* and *Willson*.

Over the next few decades, the Court refined the doctrine to accommodate the necessary balance between state and federal power. In *Cooley v. Board of Wardens of Port of Philadelphia ex rel. Soc. for Relief of Distressed Pilots*, 12 How. 299 (1852), the Court addressed local laws regulating river pilots who operated in interstate waters and guided many ships on interstate or foreign voyages. The Court held that, while Congress surely could regulate on this subject had it chosen to act, the State, too, could regulate. The Court distinguished between those subjects that by their nature “imperatively deman[d] a single

Opinion of the Court

uniform rule, operating equally on the commerce of the United States,” and those that “deman[d] th[e] diversity, which alone can meet . . . local necessities.” *Id.*, at 319. Though considerable uncertainties were yet to be overcome, these precedents still laid the groundwork for the analytical framework that now prevails for Commerce Clause cases.

This Court’s doctrine has developed further with time. Modern precedents rest upon two primary principles that mark the boundaries of a State’s authority to regulate interstate commerce. First, state regulations may not discriminate against interstate commerce; and second, States may not impose undue burdens on interstate commerce. State laws that discriminate against interstate commerce face “a virtually *per se* rule of invalidity.” *Granholm v. Heald*, 544 U. S. 460, 476 (2005) (internal quotation marks omitted). State laws that “regulat[e] even-handedly to effectuate a legitimate local public interest . . . will be upheld unless the burden imposed on such commerce is clearly excessive in relation to the putative local benefits.” *Pike v. Bruce Church, Inc.*, 397 U. S. 137, 142 (1970); see also *Southern Pacific, supra*, at 779. Although subject to exceptions and variations, see, e.g., *Hughes v. Alexandria Scrap Corp.*, 426 U. S. 794 (1976); *Brown-Forman Distillers Corp. v. New York State Liquor Authority*, 476 U. S. 573 (1986), these two principles guide the courts in adjudicating cases challenging state laws under the Commerce Clause.

B

These principles also animate the Court’s Commerce Clause precedents addressing the validity of state taxes. The Court explained the now-accepted framework for state taxation in *Complete Auto Transit, Inc. v. Brady*, 430 U. S. 274 (1977). The Court held that a State “may tax exclusively interstate commerce so long as the tax does not

Opinion of the Court

create any effect forbidden by the Commerce Clause.” *Id.*, at 285. After all, “interstate commerce may be required to pay its fair share of state taxes.” *D. H. Holmes Co. v. McNamara*, 486 U. S. 24, 31 (1988). The Court will sustain a tax so long as it (1) applies to an activity with a substantial nexus with the taxing State, (2) is fairly apportioned, (3) does not discriminate against interstate commerce, and (4) is fairly related to the services the State provides. See *Complete Auto*, *supra*, at 279.

Before *Complete Auto*, the Court had addressed a challenge to an Illinois tax that required out-of-state retailers to collect and remit taxes on sales made to consumers who purchased goods for use within Illinois. *Bellas Hess*, 386 U. S., at 754–755. The Court held that a mail-order company “whose only connection with customers in the State is by common carrier or the United States mail” lacked the requisite minimum contacts with the State required by both the Due Process Clause and the Commerce Clause. *Id.*, at 758. Unless the retailer maintained a physical presence such as “retail outlets, solicitors, or property within a State,” the State lacked the power to require that retailer to collect a local use tax. *Ibid.* The dissent disagreed: “There should be no doubt that this large-scale, systematic, continuous solicitation and exploitation of the Illinois consumer market is a sufficient ‘nexus’ to require *Bellas Hess* to collect from Illinois customers and to remit the use tax.” *Id.*, at 761–762 (opinion of Fortas, J., joined by Black and Douglas, JJ.).

In 1992, the Court reexamined the physical presence rule in *Quill*. That case presented a challenge to North Dakota’s “attempt to require an out-of-state mail-order house that has neither outlets nor sales representatives in the State to collect and pay a use tax on goods purchased for use within the State.” 504 U. S., at 301. Despite the fact that *Bellas Hess* linked due process and the Commerce Clause together, the Court in *Quill* overruled the

Opinion of the Court

due process holding, but not the Commerce Clause holding; and it thus reaffirmed the physical presence rule. 504 U. S., at 307–308, 317–318.

The Court in *Quill* recognized that intervening precedents, specifically *Complete Auto*, “might not dictate the same result were the issue to arise for the first time today.” 504 U. S., at 311. But, nevertheless, the *Quill* majority concluded that the physical presence rule was necessary to prevent undue burdens on interstate commerce. *Id.*, at 313, and n. 6. It grounded the physical presence rule in *Complete Auto*’s requirement that a tax have a “substantial nexus” with the activity being taxed. 504 U. S., at 311.

Three Justices based their decision to uphold the physical presence rule on *stare decisis* alone. *Id.*, at 320 (Scalia, J., joined by KENNEDY and THOMAS, JJ., concurring in part and concurring in judgment). Dissenting in relevant part, Justice White argued that “there is no relationship between the physical-presence/nexus rule the Court retains and Commerce Clause considerations that allegedly justify it.” *Id.*, at 327 (opinion concurring in part and dissenting in part).

III

The physical presence rule has “been the target of criticism over many years from many quarters.” *Direct Marketing Assn. v. Brohl*, 814 F.3d 1129, 1148, 1150–1151 (CA10 2016) (Gorsuch, J., concurring). *Quill*, it has been said, was “premised on assumptions that are unfounded” and “riddled with internal inconsistencies.” Rothfeld, *Quill: Confusing the Commerce Clause*, 56 Tax Notes 487, 488 (1992). *Quill* created an inefficient “online sales tax loophole” that gives out-of-state businesses an advantage. A. Laffer & D. Arduin, *Pro-Growth Tax Reform and E-Fairness* 1, 4 (July 2013). And “while nexus rules are clearly necessary,” the Court “should focus on rules that

Opinion of the Court

are appropriate to the twenty-first century, not the nineteenth.” Hellerstein, *Deconstructing the Debate Over State Taxation of Electronic Commerce*, 13 *Harv. J. L. & Tech.* 549, 553 (2000). Each year, the physical presence rule becomes further removed from economic reality and results in significant revenue losses to the States. These critiques underscore that the physical presence rule, both as first formulated and as applied today, is an incorrect interpretation of the Commerce Clause.

A

Quill is flawed on its own terms. First, the physical presence rule is not a necessary interpretation of the requirement that a state tax must be “applied to an activity with a substantial nexus with the taxing State.” *Complete Auto*, 430 U. S., at 279. Second, *Quill* creates rather than resolves market distortions. And third, *Quill* imposes the sort of arbitrary, formalistic distinction that the Court’s modern Commerce Clause precedents disavow.

1

All agree that South Dakota has the authority to tax these transactions. S. B. 106 applies to sales of “tangible personal property, products transferred electronically, or services *for delivery into South Dakota*.” §1 (emphasis added). “It has long been settled” that the sale of goods or services “has a sufficient nexus to the State in which the sale is consummated to be treated as a local transaction taxable by that State.” *Oklahoma Tax Comm’n v. Jefferson Lines, Inc.*, 514 U. S. 175, 184 (1995); see also 2 C. Trost & P. Hartman, *Federal Limitations on State and Local Taxation* 2d §11:1, p. 471 (2003) (“Generally speaking, a sale is attributable to its destination”).

The central dispute is whether South Dakota may require remote sellers to collect and remit the tax without some additional connection to the State. The Court has

Opinion of the Court

previously stated that “[t]he imposition on the seller of the duty to insure collection of the tax from the purchaser does not violate the [C]ommerce [C]lause.” *McGoldrick v. Berwind-White Coal Mining Co.*, 309 U. S. 33, 50, n. 9 (1940). It is a “familiar and sanctioned device.” *Scripto, Inc. v. Carson*, 362 U. S. 207, 212 (1960). There just must be “a substantial nexus with the taxing State.” *Complete Auto, supra*, at 279.

This nexus requirement is “closely related,” *Bellas Hess*, 386 U. S., at 756, to the due process requirement that there be “some definite link, some minimum connection, between a state and the person, property or transaction it seeks to tax,” *Miller Brothers Co. v. Maryland*, 347 U. S. 340, 344–345 (1954). It is settled law that a business need not have a physical presence in a State to satisfy the demands of due process. *Burger King Corp. v. Rudzewicz*, 471 U. S. 462, 476 (1985). Although physical presence “frequently will enhance” a business’ connection with a State, “it is an inescapable fact of modern commercial life that a substantial amount of business is transacted . . . [with no] need for physical presence within a State in which business is conducted.” *Quill*, 504 U. S., at 308. *Quill* itself recognized that “[t]he requirements of due process are met irrespective of a corporation’s lack of physical presence in the taxing State.” *Ibid.*

When considering whether a State may levy a tax, Due Process and Commerce Clause standards may not be identical or coterminous, but there are significant parallels. The reasons given in *Quill* for rejecting the physical presence rule for due process purposes apply as well to the question whether physical presence is a requisite for an out-of-state seller’s liability to remit sales taxes. Physical presence is not necessary to create a substantial nexus.

The *Quill* majority expressed concern that without the physical presence rule “a state tax might unduly burden interstate commerce” by subjecting retailers to tax-

Opinion of the Court

collection obligations in thousands of different taxing jurisdictions. *Id.*, at 313, n. 6. But the administrative costs of compliance, especially in the modern economy with its Internet technology, are largely unrelated to whether a company happens to have a physical presence in a State. For example, a business with one salesperson in each State must collect sales taxes in every jurisdiction in which goods are delivered; but a business with 500 salespersons in one central location and a website accessible in every State need not collect sales taxes on otherwise identical nationwide sales. In other words, under *Quill*, a small company with diverse physical presence might be equally or more burdened by compliance costs than a large remote seller. The physical presence rule is a poor proxy for the compliance costs faced by companies that do business in multiple States. Other aspects of the Court's doctrine can better and more accurately address any potential burdens on interstate commerce, whether or not *Quill*'s physical presence rule is satisfied.

2

The Court has consistently explained that the Commerce Clause was designed to prevent States from engaging in economic discrimination so they would not divide into isolated, separable units. See *Philadelphia v. New Jersey*, 437 U. S. 617, 623 (1978). But it is “not the purpose of the [C]ommerce [C]lause to relieve those engaged in interstate commerce from their just share of state tax burden.” *Complete Auto*, *supra*, at 288 (internal quotation marks omitted). And it is certainly not the purpose of the Commerce Clause to permit the Judiciary to create market distortions. “If the Commerce Clause was intended to put businesses on an even playing field, the [physical presence] rule is hardly a way to achieve that goal.” *Quill*, *supra*, at 329 (opinion of White, J.).

Quill puts both local businesses and many interstate

Opinion of the Court

businesses with physical presence at a competitive disadvantage relative to remote sellers. Remote sellers can avoid the regulatory burdens of tax collection and can offer *de facto* lower prices caused by the widespread failure of consumers to pay the tax on their own. This “guarantees a competitive benefit to certain firms simply because of the organizational form they choose” while the rest of the Court’s jurisprudence “is all about preventing discrimination between firms.” *Direct Marketing*, 814 F. 3d, at 1150–1151 (Gorsuch, J., concurring). In effect, *Quill* has come to serve as a judicially created tax shelter for businesses that decide to limit their physical presence and still sell their goods and services to a State’s consumers—something that has become easier and more prevalent as technology has advanced.

Worse still, the rule produces an incentive to avoid physical presence in multiple States. Distortions caused by the desire of businesses to avoid tax collection mean that the market may currently lack storefronts, distribution points, and employment centers that otherwise would be efficient or desirable. The Commerce Clause must not prefer interstate commerce only to the point where a merchant physically crosses state borders. Rejecting the physical presence rule is necessary to ensure that artificial competitive advantages are not created by this Court’s precedents. This Court should not prevent States from collecting lawful taxes through a physical presence rule that can be satisfied only if there is an employee or a building in the State.

3

The Court’s Commerce Clause jurisprudence has “eschewed formalism for a sensitive, case-by-case analysis of purposes and effects.” *West Lynn Creamery, Inc. v. Healy*, 512 U. S. 186, 201 (1994). *Quill*, in contrast, treats economically identical actors differently, and for arbitrary

Opinion of the Court

reasons.

Consider, for example, two businesses that sell furniture online. The first stocks a few items of inventory in a small warehouse in North Sioux City, South Dakota. The second uses a major warehouse just across the border in South Sioux City, Nebraska, and maintains a sophisticated website with a virtual showroom accessible in every State, including South Dakota. By reason of its physical presence, the first business must collect and remit a tax on all of its sales to customers from South Dakota, even those sales that have nothing to do with the warehouse. See *National Geographic*, 430 U. S., at 561; *Scripto, Inc.*, 362 U. S., at 211–212. But, under *Quill*, the second, hypothetical seller cannot be subject to the same tax for the sales of the same items made through a pervasive Internet presence. This distinction simply makes no sense. So long as a state law avoids “any effect forbidden by the Commerce Clause,” *Complete Auto*, 430 U. S., at 285, courts should not rely on anachronistic formalisms to invalidate it. The basic principles of the Court’s Commerce Clause jurisprudence are grounded in functional, marketplace dynamics; and States can and should consider those realities in enacting and enforcing their tax laws.

B

The *Quill* Court itself acknowledged that the physical presence rule is “artificial at its edges.” 504 U. S., at 315. That was an understatement when *Quill* was decided; and when the day-to-day functions of marketing and distribution in the modern economy are considered, it is all the more evident that the physical presence rule is artificial in its entirety.

Modern e-commerce does not align analytically with a test that relies on the sort of physical presence defined in *Quill*. In a footnote, *Quill* rejected the argument that “title to ‘a few floppy diskettes’ present in a State” was

Opinion of the Court

sufficient to constitute a “substantial nexus,” *id.*, at 315, n. 8. But it is not clear why a single employee or a single warehouse should create a substantial nexus while “physical” aspects of pervasive modern technology should not. For example, a company with a website accessible in South Dakota may be said to have a physical presence in the State via the customers’ computers. A website may leave cookies saved to the customers’ hard drives, or customers may download the company’s app onto their phones. Or a company may lease data storage that is permanently, or even occasionally, located in South Dakota. Cf. *United States v. Microsoft Corp.*, 584 U. S. ____ (2018) (*per curiam*). What may have seemed like a “clear,” “bright-line tes[t]” when *Quill* was written now threatens to compound the arbitrary consequences that should have been apparent from the outset. 504 U. S., at 315.

The “dramatic technological and social changes” of our “increasingly interconnected economy” mean that buyers are “closer to most major retailers” than ever before—“regardless of how close or far the nearest storefront.” *Direct Marketing Assn. v. Brohl*, 575 U. S. ____, ____, ____ (2015) (KENNEDY, J., concurring) (slip op., at 2, 3). Between targeted advertising and instant access to most consumers via any internet-enabled device, “a business may be present in a State in a meaningful way without” that presence “being physical in the traditional sense of the term.” *Id.*, at ____ (slip op., at 3). A virtual showroom can show far more inventory, in far more detail, and with greater opportunities for consumer and seller interaction than might be possible for local stores. Yet the continuous and pervasive virtual presence of retailers today is, under *Quill*, simply irrelevant. This Court should not maintain a rule that ignores these substantial virtual connections to the State.

Opinion of the Court

C

The physical presence rule as defined and enforced in *Bellas Hess* and *Quill* is not just a technical legal problem—it is an extraordinary imposition by the Judiciary on States’ authority to collect taxes and perform critical public functions. Forty-one States, two Territories, and the District of Columbia now ask this Court to reject the test formulated in *Quill*. See Brief for Colorado et al. as *Amici Curiae*. *Quill*’s physical presence rule intrudes on States’ reasonable choices in enacting their tax systems. And that it allows remote sellers to escape an obligation to remit a lawful state tax is unfair and unjust. It is unfair and unjust to those competitors, both local and out of State, who must remit the tax; to the consumers who pay the tax; and to the States that seek fair enforcement of the sales tax, a tax many States for many years have considered an indispensable source for raising revenue.

In essence, respondents ask this Court to retain a rule that allows their customers to escape payment of sales taxes—taxes that are essential to create and secure the active market they supply with goods and services. An example may suffice. Wayfair offers to sell a vast selection of furnishings. Its advertising seeks to create an image of beautiful, peaceful homes, but it also says that “[o]ne of the best things about buying through Wayfair is that we do not have to charge sales tax.” Brief for Petitioner 55. What Wayfair ignores in its subtle offer to assist in tax evasion is that creating a dream home assumes solvent state and local governments. State taxes fund the police and fire departments that protect the homes containing their customers’ furniture and ensure goods are safely delivered; maintain the public roads and municipal services that allow communication with and access to customers; support the “sound local banking institutions to support credit transactions [and] courts to ensure collection of the purchase price,” *Quill*, 504 U. S., at 328 (opin-
